

BABY SCALE S212

Brand: Scaleson

- Baby and toddler scale
- Detachable baby scale
- Maximum load 20/100 kg, division 10/50 g
- Easy to read LC display

Product Description

The simple and intuitive operation, the tare and memory function as well as the easy-to-clean construction make the S212 baby scale a popular companion for midwives, parents and birth centres. The highlight of this scale is the removable baby tray. This means that infants can also be weighed on the scale while standing or sitting.

- 2 in 1 baby and toddler scale in modern design
- Multi-range scale: In the range up to 20 kg, weighing is done in 10 g steps. From 20 kg, the scale can be used to weigh in 50 g steps
- Easily removable baby tray
- Use as toddler scale with high-quality glass surface

Wide range of applications...

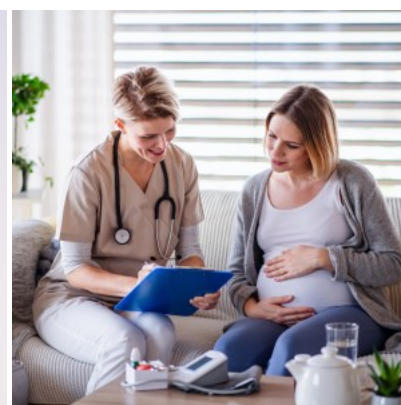

At home

In the first years of life, your baby grows especially fast. To keep an eye on this development at home, the Scaleson baby scale S212 is the perfect companion. The baby scale is characterised by its simple operation, the integrated memory function and the removable baby tray, which allows it to be used up to toddler age.

At the pharmacy

Sometimes the paediatrician or midwife recommends keeping an eye on the baby's weight development. Many pharmacies offer young parents the opportunity to borrow a baby scale for the first weeks and months. Due to the low weight of the scale and the simple operation, it is ideally suited as a lending scale for pharmacies.

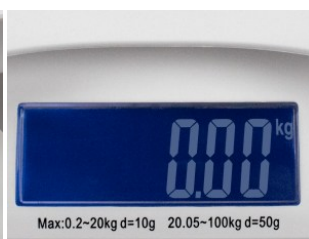

For midwives

The baby's weight provides information about how it is developing and how much food it is really eating. Sometimes it is important to keep a close eye on the weight. Midwives also check the weight regularly. The baby scale S212 is also ideal for this, as it is easy to transport due to its low weight and the memory function provides information about how the weight has changed since the last measurement.

The special feature of our baby scale S212...

Simple operation

Easy-to-read display

Anti-slip

Use as a toddler scale

The scale can be switched on and off very easily with the "ON/TARE/OFF" key. The tare function allows the net weight to be determined, e.g. without blankets or towels underneath. The unit key "UNIT" can be used to change the unit from kg to lbs. By pressing the "MEMORY" key, you can display the last determined weight at any time.

The Scaleson baby scale S212 has a large and easy-to-read LCD display. The backlighting allows you to read the determined values without any problems even in poor lighting conditions.

The underside of the scale is equipped with four rubber feet. This always ensures a secure hold on a wide variety of surfaces.

The highlight of the Scaleson baby and toddler scale S212 is the removable baby tray. This means that infants can also be weighed on the scale while standing or sitting.
